- Creativity and Design Sensibility.
- Problem-Solving Skills.

PROJECT

SHAREPOINT-BASED PROJECT MANAGEMENT PORTAL

- HTML, CSS, JavaScript, TypeScript, SharePoint, SP REST API, Ant Design, React (if applicable) .
- Currently working on a live project to develop a Project Management Portal using SharePoint as the backend platform.
- The application facilitates management of tasks, team collaboration, and project tracking.
- Implemented dynamic web pages using HTML, CSS, JavaScript, and TypeScript.
- Integrated SharePoint APIs (SP REST API) to perform CRUD operations (Create, Read, Update, Delete) on SharePoint lists.
- Utilized Ant Design component library for building responsive and visually consistent UI.
- Focused on user-friendly design and seamless data interaction with SharePoint lists.
- Collaborated with the development team for UI design, API integration, and feature testing.
